EDUCATION

Hindustan Institute of Technology & Science, Chennai2022 – 2026
B.Tech, Computer Science Engineering - CGPA: 8.4

Revoor Padmanabha Chetty Matriculation Higher Secondary School, Chennai2022
Higher Secondary (Class XII)85%

PROJECTS

FACE RECOGNITION ATTENDANCE SYSTEM - *Python, OpenCV, CNN, NumPy*

- Built an automated attendance system using deep-learning face recognition, used in a classroom to replace manual attendance tracking.
- Designed a real-time face detection and recognition pipeline using OpenCV and Convolutional Neural Networks (CNNs).
- Improved model performance through image preprocessing (face extraction, resizing) and tuned recognition for varying lighting conditions and viewing angles.

INSURANCE COST PREDICTION -*Python, Pandas, NumPy, Scikit-learn*

- Built a regression model in Scikit-learn to predict insurance costs from customer attributes: age, BMI, smoking status, region and dependents.
- Performed EDA, data cleaning, feature engineering and categorical encoding in Pandas to prepare model-ready data.
- Compared **2** algorithms, Linear Regression and Random Forest Regression, and selected the best performer using R^2, MAE and MSE.

AI-BASED THREAT DETECTION - *Python, Pandas, NumPy, Random Forest, Jupyter*

- Developed a Random Forest model in Python to detect cyber threats from network logs.
- Integrated real-time alerts via Telegram and Slack APIs for instant threat reporting.
- Evaluating detection performance using precision, recall and F1-score. .

INVOICEFLOW- INVOICING ESTIMATES & BILLING APP - *HTML, CSS, JavaScript, Python, Rest APIs*

- Developed an invoicing application to create, manage and track customer invoices
- Implemented estimate generation, invoice management and billing workflows.

ADVENTUREWORKS SALES, RETURNS & CUSTOMER ANALYTICS - *Power BI, DAX, Power Query, Data Modeling*

- Designed interactive Power BI dashboards with slicers, charts and KPI cards, using Power Query to clean sales, customer, product and returns data.

VIRTUAL EXPERIENCE

Quantium (via Forage)Virtual:
Data Analytics Virtual Experience ProgramRemote

- Built interactive Power BI dashboards to visualise business KPIs and performance metrics for real-world retail case studies.
- Cleaned, transformed and validated datasets using SQL, Excel and Power BI to ensure data accuracy and consistency.

CERTIFICATIONS

- **Data Analytics – FITA Training:** hands-on Python, SQL and Power BI projects in data cleaning, analysis, visualisation and dashboard development.
- **Python Programming – Udemy:** OOP, data structures, functions, file handling, exception handling and core Python libraries.
- **SQL Fundamentals – IBM:** querying, joins, subqueries, aggregate functions and relational database concepts.

SKILLS

- **Programming:** Python, SQL, Java, JavaScript, HTML, CSS, React
- **Machine Learning & AI:** Supervised Learning, Regression, Classification, Deep Learning, CNN, Data Preprocessing, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib
- **Tools & Data:** REST APIs, JSON, API Integration, Git, GitHub, VS Code, Jupyter Notebook, Power BI, Excel
- **LLM Evaluation:** DeepEval, Ragas, promptfoo, LangSmith
- **Automation & Testing:** Playwright, Selenium, Appium (Mobile & Web Automation), API Testing
