EDUCATION

Hindustan Institute of Technology & Science, Chennai **2022 – 2026**
B.Tech, Computer Science Engineering - CGPA: 8.4
Revoor Padmanabha Chetty Matriculation Higher Secondary School, Chennai **2022**
Higher Secondary (Class XII) *85%*

PROJECTS

ADVENTUREWORKS SALES, RETURNS & CUSTOMER ANALYTICS - *Power BI, DAX, Power Query, Data Modeling*

- Designed interactive Power BI dashboards with slicers, charts and KPI cards to analyse sales, returns and customer performance.
- Cleaned and transformed sales, customer, product and returns data using Power Query and related the tables in a data model for reporting.
- Built DAX measures to calculate KPIs and support business-focused reporting.

INSURANCE COST PREDICTION - *Python, Pandas, NumPy, Scikit-learn*

- Performed EDA, data cleaning, feature engineering and categorical encoding in Pandas to explore how age, BMI, smoking status, region and dependents relate to insurance cost.
- Built and compared 2 regression models, Linear Regression and Random Forest Regression, and selected the best performer using R^2, MAE and MSE.

AI-BASED THREAT DETECTION - *Python, Pandas, NumPy, Random Forest, Jupyter*

- Analysed network log data and developed a Random Forest model in Python to detect cyber threats.
- Integrated real-time alerts via Telegram and Slack APIs and evaluated detection performance using precision, recall and F1-score.

FACE RECOGNITION ATTENDANCE SYSTEM - *Python, OpenCV, CNN, NumPy*

- Built an automated attendance system using deep-learning face recognition, used in a classroom to replace manual attendance tracking.
- Improved model performance through image preprocessing (face extraction, resizing) and tuned recognition for varying lighting conditions and viewing angles.

INVOICEFLOW - INVOICING ESTIMATES & BILLING APP - *HTML, CSS, JavaScript, Python, Rest APIs*

- Developed an invoicing application to create, manage and track customer invoices, with estimate generation and billing workflows.

VIRTUAL EXPERIENCE

Quantium (via Forage) **Virtual**
Data Analytics Virtual Experience Program *Remote*

- Built interactive Power BI dashboards to visualise business KPIs and performance metrics for real-world retail case studies.
- Cleaned, transformed and validated datasets using SQL, Excel and Power BI to ensure data accuracy and consistency.

CERTIFICATIONS

- **Data Analytics – FITA Training:** hands-on Python, SQL and Power BI projects in data cleaning, analysis, visualisation and dashboard development.
- **SQL Fundamentals – IBM:** querying, joins, subqueries, aggregate functions and relational database concepts.
- **Python Programming – Udemy:** OOP, data structures, functions, file handling, exception handling and core Python libraries.

SKILLS

- **Data Analytics & BI:** Power BI, DAX, Power Query, Data Modeling, Dashboards, KPI Reporting, Excel, Data Cleaning, EDA, Data Visualisation
- **Programming & Databases:** SQL, Python, Java, JavaScript, HTML, CSS, React
- **Python Libraries:** Pandas, NumPy, Matplotlib, Scikit-learn, OpenCV, Jupyter Notebook
- **Machine Learning:** Supervised Learning, Regression, Classification, Deep Learning, CNN, Data Preprocessing
- **Tools:** REST APIs, JSON, API Integration, Git, GitHub, VS Code
